

Genesis Touch® 3.10

Remote Patient Monitor

The Genesis Touch® patient monitor is an essential component of our complete LifeStream™ remote patient monitoring solution. Genesis Touch software is installed on a tablet for touchscreen interaction with patients and quick deployment to patient homes in rural or urban locations. The tablet uses cellular and Wi-Fi communications to keep care providers connected with patients through LifeStream clinical monitoring software.

Resideo Life Care Solutions rigorously tests and develops Genesis Touch software for a variety of Android™-based Samsung tablets, with a specially designed patient interface that is easy to use and locked to control the patient experience, eliminate distractions and keep patients focused on healthy outcomes.

We consistently deploy meaningful and tested software updates. The latest release is designed to enhance the Genesis Touch experience for patients and caregivers, while driving improvements in clinical efficiency.

What's New in Genesis Touch® v3.10?

Increased efficiency, enhanced user experience.

- Streamlined Genesis Touch configuration updates speed patient use of new schedules by updating their schedule within minutes.
- Genesis Touch configurations reset to default, making new patient enrollment faster and easier by automatically deleting settings from the previous patient.
- An increased number of video visit participants expands flexibility to involve more family and friends, care providers, insurers, or others by supporting up to ten people on a video visit.

Simpler support, more secure patient information.

- Expanded Genesis Touch remote control permits LifeStream users to unlock and reboot a patient's tablet, adjust advanced settings and troubleshoot issues in less time.
- A custom unlock code and other platform updates increase information security while improving clinical efficiency.

Genesis Touch® 3.10

The Life Care Solutions Genesis Touch® personal health device offers:

- A tested and controlled patient interface that protects against viruses and patient tampering.
- Provide a consistent, time-tested and non-intrusive method of collecting health measurements, including pain levels and PHQ screening, for remote health monitoring by care providers.
- Extended software upgrade support, with Genesis Touch software compatibility on multiple Android™ Operating Systems.
- Cellular connectivity with every monitor, offering peace of mind and enhanced messaging options when monitoring patient health from hard-to-reach rural areas.
- Optional Wi-Fi connectivity for Video Visits with patients and care providers using LifeStream.
- Native integration with our LifeStream platform for access to all of the latest features.
- Support for Canadian-French, Spanish, Chinese and Vietnamese patient languages.

Integrated Video Improves Quality of Care and Enables Patient Interaction

- Enable patients to easily join a video visit with their care providers and family members, and help patients remember their scheduled video session with reminders and schedule confirmations.
- Support for small group education sessions with a clinician using LifeStream.
- LifeStream is designed to help organizations accurately report interactive communication.

An Emphasis on Education

- Assign video education modules and comprehension questions directly from LifeStream.
- Replay video education on demand, not only during scheduled monitoring time.
- Set video comprehension questions and monitor completion of assigned modules in LifeStream.
- Encourage patients to become more involved with managing their own health.

SPECIFICATIONS

Leverage a Samsung Galaxy Tab® A 8.4, powered by Android™, Verizon Wireless 4G cellular LTE™, integrated Video Visit capability and Wi-Fi.

A VARIETY OF PERIPHERAL MEDICAL DEVICES*

Reduce installation times with wireless Bluetooth® peripherals with no physical wiring.
